### 1. Introduction

The purpose of this report is to provide feedback on the public consultation, which ran from Wednesday 2 December 2015 to Friday 4 February 2016, on the future of the Colwick Vale Surgery.

The eight week consultation was led jointly by Trentside Medical Practice and Nottingham North and East CCG, with the support of the Trentside Patient Participation Group.

The aim was to gather the views of patients, partners and the wider public to understand the potential impact of the Practice's plan to stop delivering services at the Colwick Vale Surgery location.

A total of 158 responses were received during the consultation period. This included:

- 158 web and paper survey responses (the analysis is only on 148 responses as ten surveys still need to be collected and inputted)
- 1 MP letter (sent to the Practice)
- 1 patient letter (sent to NHS England)

In addition, a lot of views were shared on social media sites most notably Street View and Facebook, and these have also factored into this report.

Consultation surveys were available online, via telephone, post, and at both the surgeries. Communications collateral, including posters and flyers, were distributed to shops and the local pharmacies.

Websites and social media channels were utilised, including Facebook and Twitter, and to further engage with patients we held two public events - one at the start of the consultation and one towards to the end of the process.

Respondents to the survey fed back through an online survey, a freepost postal address or over the telephone. All responses were inputted into Survey Monkey to help with the data analysis.

Key themes from stakeholders, social media and the drop-in sessions can be found later in the report.

The scope of the consultation included the registered patients, patients living in the vicinity of the practice, the Local Medical Committee, local Councillors, Healthwatch, and local pharmacies. All 21 practices within Nottingham North and East CCG were informed of the changes and could contribute to the consultation if they wished.

In addition five practices within a two mile radius of Colwick Vale Surgery but within the boundary of Nottingham City CCG have been informed.

### 2. Background

Colwick Vale Surgery was an independent medical practice with a registered population of approximately 2,700 patients until 1 April 2011.

Following the retirement of the sole partner at Colwick Vale, a procurement exercise was undertaken by Nottinghamshire County Primary Care Trust in November 2010 to identify a new provider for the service.

Following the competitive process, neighbouring practice Netherfield Medical Practice was selected as the preferred provider. Netherfield Medical Practice had its own registered population of approximately 9,000 patients.

Nottingham (should this be Nottinghamshire?) County Teaching PCT entered a Deed of Variation with the GP partners of Netherfield Medical Practice to provide primary medical services at Colwick Vale Surgery for a period of five years until 31 March 2016.

As part of the operational arrangements, the patients registered at Colwick Vale Surgery combined with the patient list of Netherfield Medical Practice, creating a single registered population of approximately 11,700 patients. The practices were renamed Trentside Medical Group to reflect the collective arrangements.

This addendum to the contract is scheduled to end on 31 March 2016. However, the operation of a single list of patients will continue as the division of the list to the separate sites is no longer reasonably possible without extraordinary measures.

It is the firm intention of Trentside Medical Group to undertake a premises development within the Netherfield area that would have the capacity to accommodate patients from both the Netherfield and Colwick Vale sites. The practice had planned to consolidate the two sites at a later point in time, when a new premises had been approved and developed.

The partners of Trentside Medical Group have reviewed the current arrangements and concluded that the recent increases to operational costs have made the overall cost of delivering the service unsustainably high at Colwick Vale Surgery and therefore have applied to close the site.

Given the close proximity of Group's premises in Netherfield, the partners wish to apply to close Colwick Vale Surgery with effect from 31 March 2016 and patients have been informed on this basis.

All patients currently using Colwick Vale Surgery are, a.s stated above, actually registered with Trentside Medical Group and it is likely that many Colwick residents use both sites.

The Netherfield Medical Centre is 0.8 miles from Colwick Vale Surgery, and the two locations are already linked by a regular bus service, with buses every 10 mins during the day and 15 mins in early morning and evenings. The bus journey time is nine minutes.

To walk between the two sites takes approximately 19 minutes. To drive between the two sites takes around four minutes when there is no traffic

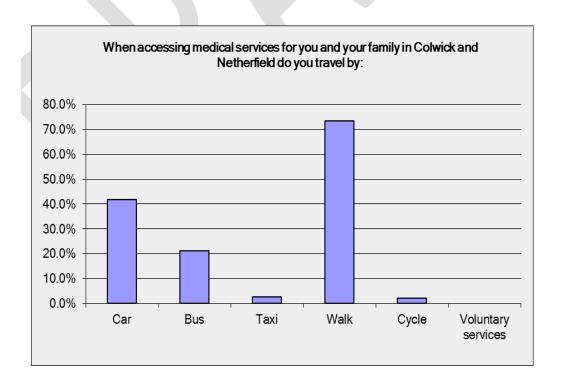

### **Survey Results**

### Q1 What's your postcode?

All postcodes were NG4 (majority) or NG2

# Q2 When accessing medical services for you and your family in Colwick and Netherfield, do you travel by:

Answer Options	Response Percent	Response Count
Car	41.8%	61
Bus	21.2%	31
Taxi	2.7%	4
Walk	73.3%	107
Cycle	2.1%	3
Voluntary services	0.0%	0
	answered question	146

# Q3 Where do you usually prefer to go for your Doctor's appointment?

Answer Choices	Responses
Netherfield	8.97% 13
Colwick	68.28% 99
Happy to go to either surgery	<b>22.76%</b> 33
Total	145

Q3. Key themes from 'other' comments		
1	1 It's inconvenient, not as close so can't walk to surgery	
2	Colwick surgery is a nicer environment than Netherfield – more friendly, nice staff, better facilities	
3	Difficult to get an appointment at either surgery	

### Q4 Are you registered for online services?

Are you registered for online services?		
Answer Options	Response Percent	Response Count
Yes	45.7%	63
No	44.9%	62
Don't know	9.4%	13

# Q5 If you answered yes to the above, have you used them to make an appointment?

If you answered yes to the above, have you used them to make an appointment?		
Answer Options	Response Percent	Response Count
Yes	51.8%	44
No	48.2%	41
	answered question	85

Q6 If Colwick Surgery closes, how will it affect you?

### Q6. Key themes (plus example comments)

#### Appointments – it will be much harder to get an appointment

- 'In the short-term before the new premises opens, I fear it will be even harder to get an appointment. In recent times I received an appointment on request 4 weeks after ringing. Surely this waiting time can be reduced'
- 'Less choice available. Already Netherfield heavily booked in advance, making it near impossible to get an appointment. Telephone always engaged. Closure of Colwick will put even more pressure on Netherfield'
- It will affect me because the Netherfield surgery is always busy as it is ,so if Colwick closes it will be busier and therefore more difficult to make an appointment. I have been waiting for my sons red book to be filled in over a month now from Netherfield surgery and the receptionists are being sarcastic that I keep asking for it.

# Cost and time implications of having to travel - too far to walk, buses and taxis are expensive

- It will affect me and my wife very bad especially my wife who cannot drive. therefore getting to Netherfield is not very easy
- Will be a huge effect on my family. We will have to walk 35 minutes to the doctors surgery or get the bus which takes a 90 minute journey in total as the bus stop is so far from our house (Crosslands Meadow) my parents are getting old and will not be able to do this soon.
- For mywife who has had major heart surgery the ease and support provided by all in Colwick has been greatly appreciated by us both She attends INR once a week and follow up appointments. If Colwick close she will need to take
- Taxis due to ill health to Netherfield

#### Inconvenience of having to travel

- I will have to drive to Netherfield & find somewhere to park. The surgery in Netherfield is overcrowded & depressing.
- We will have to use the car. Because of my work hours the Colwick surgery is perfect. If I have to travel to Neitherfield. I will have to use the car to get to appointments on time. This is for my 2 children and myself.
- Its en route to work, I'm a regular medication user monthly repeats etc.. Netherfield out of the way for m

#### Worry that pharmacy will close – knock on effect on the community

- Very badly, I have significant health needs and I already feel it is difficult to get an appointment it will be so much harder if we are all going to Netherfield. I am also concerned of the future of local business Vale pharmacy
- Loss of local facilities will be inconvenient. Chemist also likely to be lost.

1

2

4

3

- Wider loss of amenities in Colwick.
- It will be much further to walk and if the weather is bad almost impossible for me. Also the possible knock on effect of losing the local pharmacy across the road. Please do not close our local surgery.

# Q7 What would make it easier for you to access GP services in Netherfield?

Q7.	Key themes		
	More appointments		
	<ul> <li>more open surgery full time and add more GPs</li> </ul>		
	Being able to book an online appointment which is in the near rather than		
1	the far future		
	Same number or more appointments as there is now		
	Better timing, very often kept waiting long after appointment time, anything		
	up to 45 minutes.		
	Improve transport and parking - better bus routes		
	<ul> <li>Better parking, being on a bus route that passes the Netherfield Surgery.</li> </ul>		
2	Have a taxi avialable when required.		
	A bus from mile end road		
	Free transfer service		
	Move it to Colwick		
	<ul> <li>keeping colwick at least until the new surgery opens to cope with the</li> </ul>		
	demand or opening colwick full time will make more sense.		
3	• to stay in colwick		
	Move building to Colwick.		
	there is no way to make it easier for us to get to netherfield, colwick surgery		
	has over 2000 patients and should not be closed.		

# Q8 Do you have any further comments about the health services you receive in Colwick and Netherfield

Q8. Key themes	
	Colwick is generally a nicer environment with great staff
	<ul> <li>I signed up to Colwick surgery not knowing (or being told) that it is linked to</li> </ul>
1	the Netherfield practice. Having had to visit the Netherfield practice I found
	it somewhat undesirable, obviously lacking in funding and wish I had not
	moved. Colwick surgery by contrast is absolutely fine.

- Colwick Surgery has a much nicer environment than the Netherfield Surgery. It is on a major bus route and is easily accessed by either walking or by car. It would be a travesty if Colwick lost their surgery. We need our own community GP.
- Colwick was more patient friendly and receptionists and other workers are a lot nicer and helpful than the staff that work in Netherfield as well

#### Hard to get an appointment but great service

- Often difficult to get appointment in a timely manner with chosen doctor. If closing Colwick surgery means that there are more appointments available with specific doctor will accept it.
- I think there should be more bookable appointments available to have within the week. U often have to have telephone call and then explain waiting several weeks is too long. If u also know what the issue is u shouldn't have to wait for telephone call.
- I think we have been served excellently by the surgeries and am pleased to support the practice for a long as I can as they have served my family

#### Look at alternative ways to provide a GP service in Colwick

- colwick is big enough to support a doctor. A house could be converted at a much lower cost than the hire of the portacabin
- I understand the excessive cost of leasing, and operating the Colwick surgery. It is not cost effective. However, there are frequent sales of three-bedroomed houses in Colwick, at a moderate price. A regular presence consisting of a nurse, and the occasional presence of a doctor could surely be arranged. If not by the Netherfield practice, maybe this approach could be taken by another established practice. The practice in Sneinton for example. I for one, would happily transfer to any practice that is willing to provide this kind of service.

3

### 4. Key Findings

Along with the survey results, we also held two public events and monitored social media discussion about the surgery.

At the first event, 48 people attended Colwick Vale Social Club, while 79 people attended the second event at Colwick Vale Community Centre.

#### Key themes from feedback were similar to the survey and included:

- Concern about appointments
- The distance to travel to Netherfield, particularly for elderly and vulnerable patients
- The inconvenience
- Concern about the pharmacy closing
- The possibility of continuation of Colwick Vale Surgery until the new building is ready (paid for by the CCG)

#### Other

- The purpose of the consultation if the decision to close had already been made
- The pharmacist was aggrieved that the Practice is likely to move into new premises owned by Manor Pharmacy and questioned why they hadn't been approached
- The general feeling that this has been planned for the last five years and that Colwick always gets a raw deal

### Overarching themes

- Appointments
- Distance to travel
- Potential pharmacy closure
- General loss to the community it's not fair

Note: as would be expected the majority of the patients who responded had a preference for Colwick surgery.

# 5. Next steps - our response

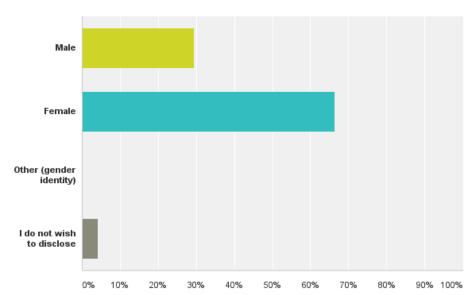

Respo	nses to concerns
1	Appointments - hard to get one, will it get harder?
	<ul> <li>Trentside confirm that there will be no less appointments</li> <li>Appointments will be available over the lunchtime period</li> <li>They are looking into extending their appointment times later</li> <li>They are now offering a morning walk-in service at Netherfield Medical Practice</li> <li>The Practice are working with their Patient Participation Group to review their appointment process and triage</li> </ul>
2	Travel - cost for families and elderly and the lack of suitable bus route for some people living in Colwick
	<ul> <li>All patients who need a home visit will receive one (as is currently the case)</li> <li>The CCG will ensure that community transport scheme information is available at the Practice and in the community</li> <li>Gedling Borough Council are looking into the bus routes around the Colwick area</li> </ul>
3.	Concern at possible loss of the local pharmacy
	<ul> <li>The pharmacy will be viable as long as patients continue to use it</li> <li>NHS NNE CCG will work with the pharmacist to ensure they are maximising their NHS income</li> <li>The pharmacist is confident it has the support of the community</li> </ul>

## **Appendix 1**

### **Equality and diversity data**

Q9 Gender

Answered: 146 Skipped: 2

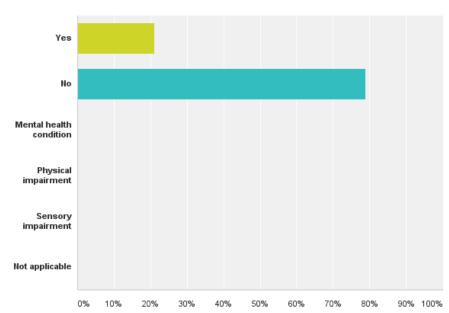

### Q10 Age:

Broad range of ages, but marginally more over 60s.

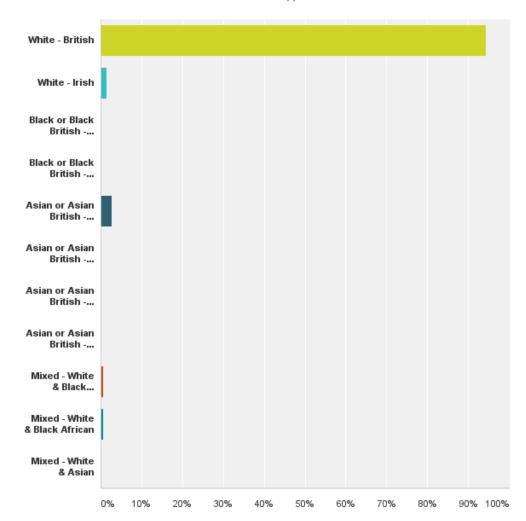

### Q11 Do you have a disability?

Answered: 138 Skipped: 10

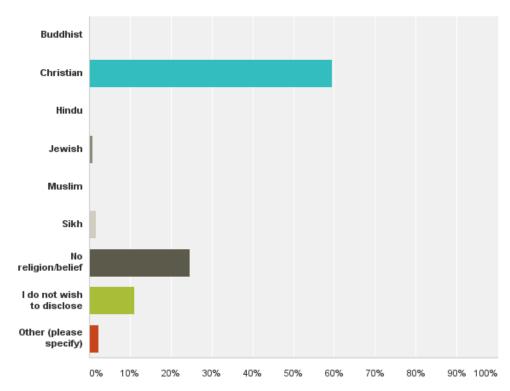

### Q12 Ethnicity

Answered: 142 Skipped: 6

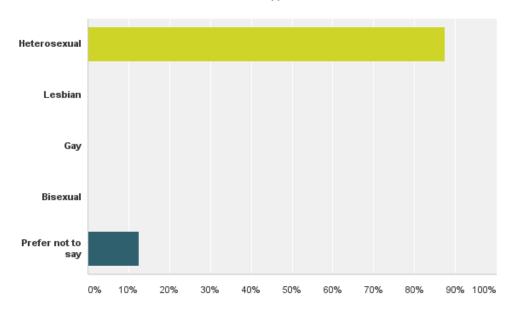

### Q13 Religion and belief

Answered: 126 Skipped: 22

### Q14 Sexual orientation

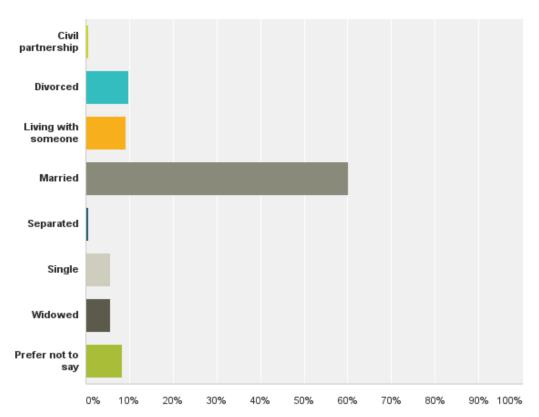

Answered: 135 Skipped: 13

### Q15 Marital status and civil partnership

Answered: 143 Skipped: 5

# Q16 Pregnancy and maternity (Are you pregnant or on maternity leave?)

Answered: 135 Skipped: 13
