

GOVERNING BODY

Title: Report of the Clinical Cabinet

Presenter: Dr James Hopkinson – Clinical Chair

Purpose of the Paper:

To inform the Governing Body of the work undertaken by Clinical Cabinet at its meeting on 16 May 2018.

Key Issues and Recommendations:

The Committee agreed to highlight the following to the Governing Body :

- An update was given on the work undertaken for progression towards a federated way or working. The federation had been invited to tender by NHS England to provide an extended out of hours service which would begin October 2018. The practices would need to formally agree to federated working to tender for this service,
- Approval for Care Co-ordinators was sought to access SystemOne to look at eHealthscope and identify patients and care gaps, and to liaise with Local partnerships and GPs to look at best interventions.

Action required by the Governing Body:

To **note** the work of the Clinical Cabinet and to respond to key issues and recommendations if required.
